

SECUTON

the creative and safe
ceramic solution

The Canberra International Sports and Aquatic Centre

SECUTON

safe in motion

SECUTON is the creative, safe ceramic solution for every type of use. The eight colours have been specially chosen to harmonise with one another.

A wide range of accessory elements, such as steps and risers and internal and external corner elements, make SECUTON a safety-orientated series that does not just provide secure grip but also looks

magnificent. Top-quality glazed surfaces mean that a hard-glaze SECUTON floor is not only highly resistant to abrasion but is also extremely easy to clean. SECUTON tiles are 10 mm thick, making them not just stronger than conventional products, but also a lot more stable and resistant wear and tear.

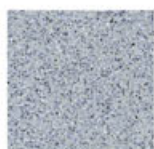

TS 10 white

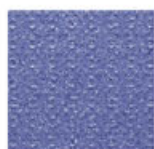

TS 20 rosé

TS 30 yellow

TS 40 blue

TS 44 azur

TS 50 mint

TS 60 grey

TS 80 anthracite
